City: _____ State: _____ Zip: _____

Contact: _____ Phone: _____ Email: _____

Waste Disposal Site:

Name: _____ Address : _____

City: _____ State: _____ Zip: _____

Landfill permit#: _____ Phone: _____

Signature: _____ Date: _____

PROCEDURE AND CONTACTS FOR THE ENTIRE DEMOLITION OF A STRUCTURE

- 1. All demolition permits shall require proof of notification to the Illinois Environmental protection agency, regardless of the type of structure.**
- 2. Written verification of the disconnection of utility services is required before Building Safety will accept a demo permit. This will include electric, gas, water and sanitary services including wells and septic systems. Water lines must be shutoff at the road and verification from utility provided.**
- 3. All electrical hookups must be removed back to the utility pole or exterior disconnecting means.**
- 4. Sewer pipes must be capped and inspected by the appropriate municipal sewer inspector. Written verification from that inspector must be provided.**
- 5. Septic systems if not going to be reused must be pumped out. Tanks then must be crushed and broken up so as not to hold water.**
- 6. Abandoned wells must meet the requirement of the 1994 Illinois Water Well Construction Code section 920.120. A copy of this requirement and guidelines for sealing all types of wells is available from this department.**
- 7. All construction debris must be removed from the site before excavation inspection. No debris is to be buried on site. Clean brick and concrete from the foundation may be used as fill. Please see attached handout on Construction and Demolition debris.**
